Covertex Extendador Roller Door Screens have been designed to prevent the entry of unauthorised personnel, dust, debris, bugs & birds while maintaining ventilation & external viewing for the factory environment

Extendador Security...the ideal solution to natural factory ventilation & lighting

A

B

C

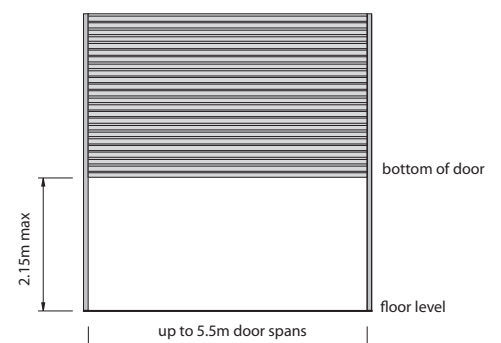

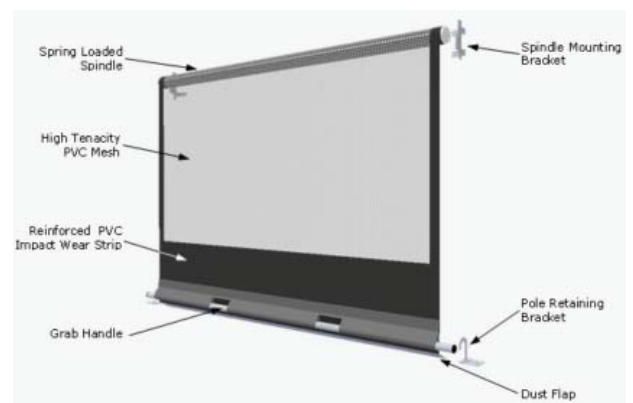

Extendador Mesh Screens are manufactured in Australia and can be retrofitted to most popular makes of roller door systems.

Operational Ease

Extendador Screens can be quickly extended or retracted in a matter of seconds providing minimum productivity interruption. The spring loaded top spindle mechanism allows minimal user effort together with positive park position for unencumbered door operation.

Material Construction

Our Extendador Mesh Screens are manufactured from high tenacity PVC/Polyester Mesh & Reinforced Vinyl to satisfy the most demanding of industrial sites. Hardware is zinc coated and designed for maximum service life.
